Municipalities:**
Murray City, Salt
Lake County

Project Description: CONSTRUCTION, Lane Addition

The 4500 South roadway currently necks down to two through lanes in each direction between 300 West and State Street, with three through lanes on the roadway west of 300 West and east of State Street. The scope of this project includes adding a third through lane eastbound and westbound between 300 West and State Street. The lane additions will be accomplished by re-striping, widening, and reconstructing the median. The traffic signal the Main Street intersection will require reconstruction to accommodate the widening. The existing Union Pacific Railroad and UTA Light Rail Bridges will remain in place. The roadway under the rail bridges will be re-striped to accommodate three lanes in each direction.

A Public Information Manager will be assigned to this project during design and construction to keep local residents, businesses and commuters informed.

NOTE: Schedule information listed above is estimated and could change without notice based on funding, scheduling constraints, stakeholder issues, and other unanticipated project elements.
